THE JOINT COMMISSION

Dear friends of Access Medical,

During this time of social isolation and stay at home orders, we at Access Medical understand the additional stress and difficulty that challenges those who have significant mobility limitations. We are here to ensure your wheelchair needs are being met.

One positive is telemedicine has been especially approved during this time. Many have thought their wheelchair orders have been put on hold. That is not the case. The essential services we provide are fully operational. We have been working closely with your medical community. Initially, industrywide, custom wheelchair orders were delayed. With telemedicine all orders are processing again. Health plans are open, and authorizations are being granted. We are delivering new custom wheelchairs and providing repairs daily.

In an effort to keep everyone safe we are working with an experienced physiatrist who can contact you at home via telemedicine. This will complete all insurance requirements associated with processing any new wheelchairs or any repairs you need. This process has proven to be even faster than the traditional requirements prior to the COVID-19 impact. Adding this telemedicine service has filled in gaps and is allowing all orders to progress cleanly, fully satisfying insurance guidelines. We are here to help you today!

Processing medical equipment through insurance does take months. A telemedicine visit in your home starts the process safely without person to person contact. We can begin assessing repairs and new equipment now. When others are waiting you can get your requests moving.

What happens when it comes time to deliver your new equipment or repairs? Our Medical Director, Dr. Jay Rosenberg, assures all of our delivery personnel are properly educated and instructed in disease control. We are following CDC guidelines at each in-person assessment and delivery. Our service team will be wearing fresh gloves, masks, and gowns. We are washing and sanitizing our hands prior to each in person visit. This assures all will remain safe and free of unwanted exposure.

Did you know Access Medical has a sister medical supply company called At-Home Medical? At-Home Medical, formerly All Home Medical Supply of San Diego and In & Out Mobility of Palm Desert, now has a new location in Anaheim. We can assist you with almost every medical product you may need. These 3 At-Home Medical retail stores are open. We have masks, gloves, wipes, thermometers, hospital beds, scooters, lift chairs. We can deliver to your home or ship medical items to you if more comfortable.

We are dedicated to providing your medical products with the most compassionate service in the industry. If there is anything we can do to help, please feel free to contact us at any of our service locations.

Sincerely,

Blaine Hunt, ATP/SMS, CRTS
